

# Vitamin E TENS Lotion

## UP237N 12 Oz. Bottle

Relieves chapping, sunburn and dry skin which can occur from continual electrotherapy use. Replenishes moisture loss which occurs as the electrical current treatment dries out the skin from treatment. Dry skin causes electrical current impedance. Dry skin flakes can stick to the electrode gel to hinder current transfer and reduce electrode life.

Dry skin requires a stronger amplitude for the current to enter the skin into the nerve paths. This causes the lead wires to wear out faster and higher amplitude requirements cause battery life to shorten.

Non greasy formulation for quick absorption.

### Enriched With;

Vitamin E  
Vitamin A  
Vitamin D  
Aloe Vera  
Sunflower Oil  
Sesame Oil  
Wheat Germ Oil  
Lightly Scented  
Dye Free  
Other Natural Ingredients

### Directions:

Apply moderately to treatment areas after treatment.
